- Seeking an opportunity in Data Engineering, Data Analysis or Fullstack Development
- Availability: immediate.

PROFESSIONAL EXPERIENCE

The Queue - Entrepreneurial project, Paris | Apr. 2025 - Present

Technical and Data Co-designer

- Collaboration with a sales professional and an investor to design an application that facilitates the search for available restaurants during peak hours.
- Requirements gathering, user journey definition and MVP scoping.
- Design of the technical architecture, data model and occupancy estimation system.
- Definition of monitoring indicators related to crowd levels, waiting times and application usage.

Renault Group, Paris | Sept. 2024 - December 2025

Apprenticeship - Data Engineer

- Design of an automated data integration pipeline (Jira, MagicDraw, Excel, Confluence).
- Storage and transformation in Google Cloud Platform (BigQuery, GCS).
- Orchestration with Apache Airflow and GitLab CI/CD integration.
- Automated indicator updates and Spotfire data feeds.

Groupe Lactalis, Laval | Apr. - Aug. 2024

Internship - Developer Analyst

- Creation of interactive interfaces to facilitate consultation and navigation through internal processes.
- Implementation of multi-criteria search and structured data display.
- Improved access to information for the team, without direct database access.
- Technologies: Java, Angular.

Digital Kakushin Soft, Sfax | Feb. - Aug. 2023

Internship - Mobile Developer

- Development of a mobile order management application for the restaurant industry.
- Design of the back end (API, business logic) and mobile front end.
- Technologies: SpringBoot, Flutter, MySQL.

ACADEMIC PROJECTS

GitHub Issue Resolution Time Prediction | Elyadata - Paris

- Design of a predictive solution to estimate issue resolution time based on metadata (title, description, language).

- Technologies: Apache Kafka (streaming), PySpark (processing), MongoDB / Azure Blob Storage (storage), MLflow (model tracking), Streamlit (interface), Docker (deployment).

NLP - Candidate/Job Matching | Piter - Rennes

- Development of a matching system between candidate profiles and job offers using natural language processing.

- Technologies: Python, SpaCy, NLP.

EDUCATION AND TRAINING

• **Master in Artificial Intelligence** - Université du Mans | 2023 - 2025

• **Bachelor in Computer Science** - Université du Mans | 2020 - 2023

OTHER

- **Skills:** Python, Java, SQL, C++, Apache Spark, Hadoop, Kafka, Airflow, NiFi, MySQL, PostgreSQL, MongoDB, AWS, GCP, Azure, Docker, Kubernetes, Terraform, Jenkins.
- **Certifications:** Get Started with Databricks for Data Engineering - Databricks Academy
Date obtained: 07/01/2026.
- **Languages:** French (Fluent), English (Advanced), Spanish (Beginner).
- **Interests:** Music, Swimming, Football, Weight Training
